Sega Game Gear on a Chip
Weekly Update #10

Max Thrun — Samir Silbak

February 1, 2013

Accomplished

- Tested VDP background generator with VRAM dumps and got it working.

- Worked on IO logic between Z80 and VDP.

- Starting looking into making custom ROMs to test specific component individually.

Planned

- Continue adding documentation and testing strategies to design report.

- Continue work on the VDP and system integration.

Outstanding Issues

None at this time.
